DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 15,16,22-38 are rejected under 35 U.S.C. 102(b) as being anticipated by USP 4,342,836 (Harvey).

The Harvey patent discloses a method and device for conducting anaerobic digestion of high-solids waste (col.2, lines 54 thru col.3, line 4). Figure 7 shows the embodiment which reads on the claimed invention. Figure 7 shows multiple chambers (767) within a base (766). Further the patent discloses that the chamber (767) may be connected in series by “u” tube connections (759) joining adjacent ends of the chambers (767) (col. 5, lines 45-67). Also, figure 7 shows that the waste material is moved along the chamber (767) in a “corkscrew-like fashion” by means of screw auger (744). The sidewall between adjacent chamber (767) is equivalent to the claimed “divider”. It is clear from the figure that the solid waste in adjacent chambers (767) would move in opposite directions. The patent also discloses that water or steam or gas may be added to the chamber in a spiral fashion in order to heat the chamber (col.4, lines 24-30; col. 4, lines 64 thru col.5, line 24; col. 6, lines 9-12). See specifically the descriptions of figures 3-5.

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The remaining US Patent references are considered to be generally related to the claimed invention.
